Scientific Movies

"In search of the Lost Ocean" (1991). Producer: F.M. Gradstein; co-producers: I.L. Kristiansen, Norway and M. Sarti, Italy. Technical realisation: Ivan Ardizoni, Antenne Verde Studios, Ferrara, Italy.

This 28 minute video highlights the high mountain trekking and geological discoveries of the 1991 "Lost Ocean" expedition in Central Nepal. The expedition provides new pieces in the puzzle of plate tectonics, the birth of the Indian Ocean and the origin of the Himalayas. The film features authentic Nepali music and blends beautiful cultural and geological images of a unique country and its mountain people in a story of "The Lost Ocean".

Computer Programs

1982 - 2005 RASC - Ranking and Scaling program for probabilistic biostratigraphic zonation and correlation (with F. Agterberg and students); version 18 (including Visual Basic colour graphics) is significantly expanded to include probabilistic correlations and variance analysis of events;

1984 - 1988 BURSUB and DEPOR - Burial and Subsidence Analysis (with B. Stam, M. Fearon, Z. Huang).

1987 - 1997 STRATCOR - "Graphic Correlation" method for interactive deterministic or probabilistic zonation and correlation (with M. Fearon, A. Jackson, D. Merrett); version 3.1 in 1993.

1992 - 1997 MAKEDAT - Data base organizer and data explorer for the quantitative biostratigraphy programs (with D. Merrett); version 5.0 in 1997.

1992 - MAKEPAR - Parameter file routine for RASC (with Z. Huang).

1993 - SIS - Stratigraphic Information System (Microfossil distribution bookkeeper and display); update and revision of program developed by T.Bjaerke, Norway.

2006 – QS Creator- Quantitative Stratigraphy Creator. Java software to facilitate data input and data conversion between RASC and CONOP programs (with A.Lugowski). *Freely downloaded from <http://www.rasc.uio.no/>*

2007 – TSCreator Pro for petroleum industry. Facilitate on-screen representation of any portion of the standard geologic time scale with choice of bio-magneto-sequence, chemo and other events in Earth History. Regional scales can also be created to calibrate well records (with A.Lugowski and J. Ogg; see for example <http://www.tscreator.org/index/index.php>

2007 – RASC version 20. Improved biostratigraphic scaling method using standard cumulative thickness intervals, and improved graphics to zone and correlate well sections (with F.Agterberg and L.Gang). *Freely downloaded from <http://www.rasc.uio.no/>*

International Scientific Websites

<http://www.stratigraphy.org> Initiated and co- organizd the official website from the International Commision on Stratigraphy (ICS).

<http://rasc.uio.no> Initiated and organize the website for the quantitative stratigraphy programs RASC & CASC, copyrighted by F.P.Agerberg and F.M.Gradstein

(<http://www.nhm.uio.no/norlex> Founder and leader of the Network for Offshore Records of Geology and Stratigraphy (NORGES), and the Norwegian Lithostratigraphic Lexicon (NORLEX).

<http://www.nhm.uio.no/novazem> Co-initiated and organise the project and website of the Novaya Zemlya Consortium at NHM.
